

CNC MILL RENTAL

For DATTA Vic Members.

As part of our Professional Learning Program, the Association has purchased a Roland "Modela" MDX-40R CNC Mill, which will be made available to schools on a very reasonable rental basis.

It comes with a fully programmed laptop, and special folding trolley to facilitate transportation.

The CNC Mill can be used for

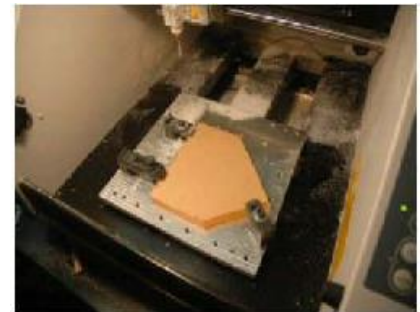

- Generating prototypes from CAD designs in modeling foam, balsa, acrylic, wax, lino, plywood etc.
- Producing printed circuit boards
- Producing model cars for Formula 1 competitions
- Cutting out repetitive parts for robotic models and toys.
- Producing jewellery prototypes for subsequent casting
- Engraving printing blocks in lino or foam for fabric printing.

The Mill will be available to member schools for a **4 week rental period** for only **\$500**, which includes the purchase of a set of expendable tools and cutters.

Schools wishing to participate in this exciting program will need to:

- (1) Apply to DATTA.Vic with an **expression of interest**.
- (2) Be familiar with **CAD programs** such as CREO, ProDesktop, ProEngineer, Catia, Solidworks, etc.
- (3) Participate in a **PL Session** on use and care of the machine.
- (4) **Book ahead** for a 4 week rental period (maximum)
- (5) **Pay** to DATTA.Vic the \$500 rental fee.
- (6) **Collect and return** the machine in clean working order.
